

FEHMARN - WE HAVE NOW STARTED

Denmark's largest construction project has begun. More than DKK 50 billion will be used directly on construction tasks. In addition, there is significant potential for secondary tasks in a variety of areas ranging from the transport, security and cleaning industries to the hotel, catering, tourism and retail industries. Up to 4000 jobs a year on Lolland-Falster will be directly or indirectly linked to the construction project.

With the Fehmarn Belt Fixed Link, Lolland-Falster will become Scandinavia's gateway to Europe. The area connects the three European metropolises, Copenhagen, Hamburg and Berlin, giving local companies unique conditions for growth. The opportunities for growth are supported by educational institutions that ensure well-trained graduates, while both skilled and unskilled labour is available in the region.

In a construction project of this size, it can be a major task to cope with all the different partnerships and sub-supplier groups, networks, authorities and organisations that can help to create value for your business.

At Business Lolland-Falster, individual sparring is available regarding your business opportunities associated with the Fehmarn Belt construction project.

You are welcome to contact us to discuss the opportunities the Fehmarn Belt project offers you

RELEVANT PARTNERS

The purpose of **Fehmarn Belt Development** is to ensure that Region Zealand citizens and businesses get the greatest possible benefits from the fixed link - before, during and after the construction phase.

Femern Agency is "one point of contact" for everyone working on the construction and expects to establish an office near the construction site in Rødbyhavn. Femern Agency is a co-operation among authorities intended to ensure smooth and effective regulatory services regarding labour for the Fehmarn Belt project.

Femern Business Park consists of a broad range of business types and offers office and warehouse facilities, housing, temporary workers in most industries, experienced welders, cars, tools, security guards, cleaning, catering, materials, etc.

FB Suppliers Femern Belt Suppliers have collected all local crafts and services in a "one point of contact" network concept that facilitates workflow for all parties in a project. The network has about 100 members.

Femern Service Partners is a local network with approximately 35 partners. FESPA provides total package solutions within transport, logistics and port operations, as well as complete and energy-optimised site huts.
